FOR IMMEDIATE RELEASE

MURFREESBORO BUILDING INSPECTIONS SERVICES NOW AVAILABLE ONLINE THROUGH BUILDINGDEPARTMENT.COM

April 18, 2006 - BUILDERadius, Inc., a leading national provider of permitting and inspections software to building permit authorities, has announced the recent adoption of its BluePrince[®] system by Murfreesboro, TN. BluePrince will streamline the permitting process for the Building Department and its customers, and provide departmental services online through the website, BuildingDepartment.com.

BluePrince simplifies the permitting clerk's job, making the process quicker and more efficient, and streamlines the process for inspectors who immediately post results from the field back to the Building Department. BuildingDepartment.com allows area contractors to apply for building permits, schedule inspections, and receive their inspection results in real-time via Internet-enabled computer, cell phone, or PDA.

"We have a tool that delivers real value to local builders and to Building Departments of any size by dramatically increasing permitting and inspection efficiencies for any jurisdiction," said Bill Ward, CEO and President of BUILDERadius. "Our customers are delighted with the software, which increases both the thoroughness and number of daily building inspections performed."

BUILDERadius designers have made the product as easy to use as QuickBooks, the popular accounting software designed for non-accountants. The simplicity has paid off as the product moves across the map and into the grateful hands of frustrated clerks, inspectors, and contractors everywhere.

If you have questions about the online contractor services available in the City of Murfreesboro, contact the Murfreesboro Building and Codes Department at (615) 893-3750 or visit www.BuildingDepartment.com.

About BUILDERadius, Inc.

Based in North Carolina, BUILDERadius serves the construction industry with its BluePrince software through www.BuildingDepartment.com. BluePrince has been developed in consultation with the International Code Council and is distributed as the official replacement for the SBCCI/ICC BDS permitting software. For more information send inquiries to info@BuildingDepartment.com or visit www.BuildingDepartment.com.
